### **CDC Announces the Opening of the 2006-2007 Flu Gallery**

Are you looking for educational materials about influenza and the flu vaccine? CDC's Flu Gallery contains educational materials for use during the upcoming influenza immunization season. These materials reflect CDC's vaccination recommendations and highlight the benefits of influenza vaccination. The Gallery contains print materials such as flyers, posters, and brochures, in color and black and white, English and Spanish. Many of the materials can be reproduced on an office printer. You can also have the materials printed by a professional (offset) printer.

We encourage you to visit the online gallery often because, as vaccine supply information changes, we will upload new materials that address expanded audiences, or new recommendations about which groups vaccine should be directed toward. Additionally, if vaccine supply is still strong toward the end of November, we will post "late season" promotion materials to the gallery which will remind people that it is not too late to get vaccinated against influenza in December and beyond. The Flu Gallery can be found at [www.cdc.gov/flu/gallery](http://www.cdc.gov/flu/gallery). Links to this information can also be found on the Wisconsin Immunization Program website at: <http://dev.dhfs.wisconsin.gov/communicable/influenza>.
